RESOLUTION

Karachi, the 24th January 1950

Tariffs

No. 351/304—In paragraph II of its Statement of Industrial Policy issued on the 2nd April 1948, the Government of Pakistan has accepted the principle of protection of industries. The Statement records that Government "will always be prepared to give favourable consideration to claims for a reasonable measure of protection for industries established in Pakistan. Such claims will be subjected to examination by a Tariff Board, to be appointed as and when required". A number of industries have come forward with claims for assistance and it is essential that the claims of these industries should be examined by an independent and impartial body so that the foundations of any policy of protection should be laid on a just and equitable basis from the initial stage. Accordingly it has been resolved to appoint a Tariff Commission to perform the functions assigned to it in this Resolution. This Tariff Commission will be authorised to carry out inquiries laid down in Section 4 of the Tariff Act.

2. It is recognized that protective tariffs are not the only means of assisting industry which can be appropriately examined by a Tariff Commission. It has, therefore, been

resolved that the Tariff Commission which is hereby appointed will perform the following functions:—

(a) It will consider and recommend what forms of assistance are necessary for the protection of an industry.

(b) It will keep under review the progress made by industries in regard to the implementation of recommendations of the Commission approved by the Government.

(c) It will advise the Government on ways and means of fostering industries and securing internal production at the most economical cost.

3. *Initiation of action in regard to claims for protection and other forms of assistance*—The Tariff Commission shall make investigations:—

(a) on application by an industry referred to the Commission by the Commerce Ministry. The application shall be addressed to the Secretary, Ministry of Commerce and Education, Commerce Division, who will make suitable arrangements for a preliminary scrutiny before the application is referred to the Commission. Such scrutiny will in general be made by the Industries Division;

(b) on a reference from the Central Government.

4. *Tariff policy*—In examining the claims of an industry referred to the Commission for tariff protection and/or assistance by Government the Commission will make such investigations as it may consider necessary, and satisfy itself that—

(1) the industry is established on sound lines and conducted with reasonable efficiency, and

(2) (a) having regard to natural advantages the industry is likely to dispense with the necessity of protection by, or assistance from, Government, within a reasonable period of time during which the additional cost to the consumer or charge upon the Exchequer is not excessive, or

(b) the establishment of the industry is essential to the security or economy of Pakistan,

(3) the protection of the industry by means of tariffs is not inconsistent with any treaty obligations undertaken by Government.

5. *Recommendations by the Commission*—After satisfying itself in the light of the conditions mentioned in paragraph 4 above that a claim for protection and/or assistance is established, the Commission shall recommend:—

(a) the rate at which a protective duty should be imposed upon any articles or class or description of articles, which may compete with the products of the industry concerned,

(b) any other forms of assistance which may be given to the industry by Central and /or Provincial Governments,

(c) the period for which, in the first instance, the protective duties and/or other forms of assistance should be applicable.

In making its recommendations, the Board shall take into consideration the interests of the consumers and will also give due weight to the interests of those industries which may use the articles in respect of which protection and/or assistance is to be granted. The Commission shall complete its enquiries and submit its report with as little delay as possible so that relief may be given expeditiously by Government to deserving cases.

6. *Personnel*—The first Pakistan Tariff Commission which is hereby appointed for an initial period of three years will consist of a Chairman, a Member and a Secretary. The head office of the Commisson will be at Karachi but they may visit such places as they consider necessary. All communications intended for the Commission shall be addressed to the Secretary of the Commission. (Attention is drawn to the provisions of the resolution according to which applications for assistance to industries should, in the first place, be sent to the Secretary, Ministry of Commerce and Education.

7. A copy of this resolution shall be transmitted to all Ministries of the Central Government, Provincial Governments and Administrations, Public bodies and Chambers of Commerce. It is hoped that they will assist the Board in carrying out its duties.

There are some provisions in the Code of Criminal Procedure, 1897, but these are not wide enough and are not elaborate and comprehensive hence there is a necessity of an enactment like that of the proposed one.

There are some provisions in the Code of Criminal Procedure, 1897, but these are not wide enough and are not elaborate and comprehensive hence there is a necessity of an enactment like that of the proposed one.

STATEMENT OF OBJECTS AND REASONS

The members of the Drugs Enquiry Committee, which was appointed by the Government of India and who published their report in 1931, found that the indigenous drugs, i.e., the drugs cultivated or grown in India or the source or origin of which is India and the use of which is confined to the practice of the Indian systems of medicine or treatment as opposed to the western system are largely used by a majority of Indian population specially in small towns and villages and that large firms for manufacturing Ayurvedic and Tibbi preparations have sprung up; there were also numerous Ayurvedic and Tibbi pharmacies in which prescriptions were dispensed and they also found that most of the indigenous drugs are not up to standard and adulterated. They strongly recommended that the Government in the interest of the large majority of population who use this form of medicament had the right and duty to regualte these preparations of the drugs and medicinal prepration. They suggested among others that Unani and Ayurvedics school should be started for proper training of practitioners in Indian system of medicine, that only those practitioners holding diplomas, degrees or licences from authorised bodies and institutions should be entitled to practice in Indian system of medicine after registration. They further recommended that the drugs and preparations of indigenous systems of treatment should be kept entirly separate as it was then that uniform curriculum and course should be prescribed for the training of the practitioners of Indian systems of medicine throughout the country. They were of opinion that the trained registered practitioners will ensure purity of drugs and some of the Indian Provinces have already put on statute books similar Acts as proposed in this Bill. This Bill has been drafted in the light of recommendation of the Drugs Enquiry Committee mentioned above. The main purpose of this Bill is to control and regulate indigenous systems of medicine with a view to its improvement and wider prevelence for the interest of the larger population of Pakistan. Formerly the Hakims and Kabirajes prepared their own medicine. Now-a-days they largely depend on bazar preparations which were found by the Committee to be largely spurious and adulterated. There is a great necessity of a Bill like that of the proposed one.

STATEMENT OF OBJECTS AND REASONS

The members of the Drugs Enquiry Committee, which was appointed by the Government of India and who published their report in 1931, found that the indigenous drugs, i.e., the drugs cultivated or grown in India or the source or origin of which is India and the use of which is confined to the practice of the Indian systems of medicine or treatment as opposed to the western system are largely used by a majority of Indian population specially in small towns and villages and that large firms for manufacturing Ayurvedic and Tibbi preparations have sprung up; there were also numerous Ayurvedic and Tibbi pharmacies in which prescriptions were dispensed and they also found that most of the indigenous drugs are not up to standard and adulterated. They strongly recommended that the Government in the interest of the large majority of population who use this form of medicament has the right and duty to regualte these preparations of the drugs and medicinal preparation. They suggested among others that Unani and Ayurvedics school should be started for proper training of practitioners in Indian system of medicine, that only those practitioners holding diplomas degrees or licences from authorised bodies and institution should be entitled to practice in Indian system of medicin after registration. They further recommended that the drug and preparations of indigenous systems of treatment shoul be kept entirly separate as it was then that uniform curri culum and course should be prescribed for the training o the practitioners of Indian systems of medicine throughou the country. They were of opinion that the trained regis tered practitioners will ensure purity of drugs and some of th Indian Provinces have already put on statute books simila Acts as proposed in this Bill. This Bill has been drafted i the light of recommendation of the Drugs Enquiry Committe mentioned above. The main purpose of this Bill is to contr and regulate indigenous systems of medicine with a view t its improvement and wider prevelence for the interest of th larger population of Pakistan. Formerly the Hakims an Kabirajes prepared their own medicine. Now-a-days the largely depend on bazar preparations which were found b the Committee to be largely spurious and adulterated There is a great necessity of a Bill like that of the propose one.

STATEMENT OF OBJECTS AND REAS[ONS]

It has been proved that Homoeopathic system of [medicine] owing to its cheapness and effectiveness, is largely us[ed by the] people of Pakistan. Quite a large number of people ha[ve been] practising Homœopathy in many areas of the Fed[eration of] Pakistan. Many of such practitioners are with[out] education in the system as a science and they are [not] versed in the technique of this system. There is no [denying] the fact that owing to non-regulation and non-contr[ol of] system of medicine by the Government this ver[y] system of medicine has fallen in the hands of unsc[rupulous] quacks who owing to their ignorance of scientific k[nowledge] of, and deep grounding in this wonderful system of

medicine have proved and are proving a source of standing danger to the national health of Pakistan. So it has become necessary to discourage quackery, to regulate and standardise education in Homoeopathy and to regulate and control its practice in the Federation of Pakistan.

Hence there is a necessity of a Bill like the one proposed.

STATEMENT OF OBJECTS AND REASONS

The members of the Drugs Enquiry Committee, which was appointed by the Government of India and who published their report in 1931, found that the indigenous drugs, *i.e.*, the drugs cultivated or grown in India or the source or origin of which is India and the use of which is confined to the practice of the Indian systems of medicine or treatment as opposed to the western system are largely used by a majority of Indian population specially in small towns and villages and that large firms for manufacturing Ayurvedic and Tibbi preparations have sprung up; there were also numerous Ayurvedic and Tibbi pharmacies in which prescriptions were dispensed and they also found that most of the indigenous drugs are not up to standard and adulterated. They strongly recommended that the Government in the interest of the large majority of population who use this form of medicament had the right and duty to regualte these preparations of the drugs and medicinal preparation. They suggested among others that Unani and Ayurvedic schools should be started for proper training of practitioners in Indian system of medicine, that only those practitioners holding diplomas, degrees or licences from authorised bodies and institutions should be entitled to practice in Indian system of medicine after registration. They further recommended that the drugs and preparations of indigenous systems of treatment should be kept entirly separate as it was then that uniform curriculum and course should be prescribed for the training of the practitioners of Indian systems of medicine throughout the country. They were of opinion that the trained registered practitioners will ensure purity of drugs and some of the Indian Provinces have already put on statute books similar Acts as proposed in this Bill. This Bill has been drafted in the light of recommendation of the Drugs Enquiry Committee mentioned above. The main purpose of this Bill is to control and regulate indigenous systems of medicine with a view to its improvement and wider prevalence for the interest of the larger population of Pakistan. Formerly the Hakims and Kabirajes prepared their own medicine. Now-a-days they largely depend on bazar preparations which were found by the Committee to be largely spurious and adulterated. There is a great necessity of a Bill like that of the proposed one.

7. Notwithstanding anything contained in section 190 of the Code of Criminal Procedure, 1898, no court other than that of a magistrate of the first class shall take cognizance of or try any case under this Act.

STATEMENT OF OBJECTS AND REASONS

It is a known fact that in Pakistan most Muslim and non-Muslim families incur expenses out of all proportion at marriages in consequence putting themselves in the hand of money-lender and losing valuable property. So costly has a wedding become that in many families it is looked upon as sheer calamity. When the state of life intended for man's happiness arouses such feeling and becomes the cause of the ruination of a happy family, something must be wrong with that society.

It is an admitted fact that many Muslim and non-Muslim families are being ruined on account of costly marriages. Unless something is done to remedy this onward march of ever-increasing cost of Muslim and non-Muslim marriages the Muslim community of Bengal, who are proverbially poor, shall die an economic death. Already some Indian States have taken some steps in this direction. China and Ankara have taken drastic measures to reduce the costs of marriage to its minimum. The fear of what people think, if a certain standard of expenditure is not reached, is one of the forces that tend to tug the average family down into poverty or something near it. Who will stand against public opinion of this sort? As now our popular Ministry is in power, it is expected that they will encourage such sumptuary legislation as this.

WEST PUNJAB KHARIF CROP SUMMARY FOR 1948

1. *Season*.—Light to moderate rain fell in January 1948. The rainfall in February was generally above normal. During March it was unusually heavy in Lahore and Rawalpindi Divisions and in fair amounts elsewhere. Light to moderate rain fell during April. Except for light showers in parts of some districts, the weather during May remained practically dry. During June it was above normal in Lahore, Sialkot, Gujranwala, Sheikhupura, Shahpur, Montgomery and Lyallpur and light to moderate elsewhere. The rainfall in July and August was excessive almost all over the province especially in Lahore, Sialkot, Gujranwala, Sheikhupura, Gujrat, Shahpur, Jhelum, Rawalpindi, Montgomery, Lyallpur and Jhang. Canal supplies were sufficient. Climate conditions were, therefore, favourable for sowings. During September the rainfall was above normal in Gujranwala, Gujrat, Jhelum, Rawalpindi and Attock but light to moderate elsewhere except Lahore, Sheikhupura, Montgomery, Lyallpur and Jhang where weather remained dry. Light to moderate rain fell in parts of some districts during October but the weather during November was practically dry. Canal supplies were sufficient for the maturing of the kharif crops. There were complaints of premature and bad opening of bolls of American Cotton from parts of Sheikhupura, Montgomery, Lyallpur and Multan. Excessive rains damaged the crops in parts of some districts. Crops in the riverain tracts of the Lahore, Sheikhupura, Shahpur, Montgomery, Jhang and Multan were totally destroyed by floods. Cotton crop was also affected by frost at some places.

2. *Yield*.—The yield of cotton was below normal and that of rice was generally normal to above normal. The outturn of jowar and maize was generally below normal to normal except jowar in Mianwali and maize in Montgomery, the yield of which was reported to be above normal. The outturn of bajra was generally normal to above normal and that of sugarcane was very good.

3. *Area*—The total sown area is 6·4 million acres against 6·5 million acres in the year 1947. The variations under principal crops are shown below :—

14. The contractor acknowledges that he has made himself fully acquainted with all the conditions and circumstances under which the supplies required under the contract will have to be made or furnished and with all the terms, clauses, conditions, specifications and other details of the contract and the contractor shall not plead ignorance of any of those as excuse in case of complaint against or on rejection of supplies tendered by him or with a view either to asking for enhancement of any rates agreed to in the contract or to evading any of his obligations under the contract.

And the contractor shall not be entitled to benefit from any profit which may thus accrue to Government.

The termination of this contract in whole or part under these conditions shall not be affected by the acceptance, meanwhile or subsequently, of supplies accepted or made at any station whether in ignorance of the termination or otherwise.

17. If any question, difference or objection whatsoever shall arise in any way connected with or arising out of this instrument or the meaning or operation of any part thereof of the rights, duties, or liabilities of either party, then save in so far as the decision of any such matter is hereinbefore provided for and has been so decided, every such matter including whether its decision has been otherwise provided for and/or whether it has been finally decided accordingly or whether the contract should be terminated or has been rightly terminated in whole or part and as regards the rights and obligations of the parties as the result of such termination shall be referred for arbitration to the Deputy Director of Industries, Industrial Research, Punjab, and his decision shall be final and binding and where the matter involves a claim the amount if any awarded in such arbitration shall be recoverable in respect of the matter so referred.

14. The contractor acknowledges that he has made himself fully acquainted with all the conditions and circumstances under which the supplies required under the contract will have to be made or furnished and with all the terms, clauses, conditions, specifications and other details of the contract and the contractor shall not plead ignorance of any of those as excuse in case of complaint against or on rejection of supplies tendered by him or with a view either to asking for enhancement of any rates agreed to in the contract or to evading any of his obligations under the contract.

17. If any question, difference or objection whatsoever shall arise in any way connected with or arising out of this instrument or the meaning or operation of any part thereof of the rights, duties, or liabilities of either party, then save in so far as the decision of any such matter is hereinbefore provided for and has been so decided, every such matter including whether its decision has been otherwise provided for and/or whether it has been finally decided accordingly or whether the contract should be terminated or has been rightly terminated in whole or part and as regards the rights and obligations of the parties as the result of such termination shall be referred for arbitration to the Deputy Director of Industries, Industrial Research, Punjab, and his decision shall be final and binding and where the matter involves a claim the amount if any awarded in such arbitration shall be recoverable in respect of the matter so referred.

If for the purpose of determining the quality of stores the aforesaid officer finds it necessary to have the stores tested at the test-house or laboratory, all expenses incidental to the test shall be borne by the contractor. despatch of such consignment may be in arrears, or alternatively at the option of the purchaser, the purchaser shall be entitled to purchase such consignment (or if not available, the best and the nearest available substitute therefor) elsewhere on the account and at the risk of the contractor or to cancel the contract, and the contractor shall be liable for any loss or damage which the purchaser sustains by reason of such failure on the part of the contractor.

14. The contractor acknowledges that he has made himself fully acquainted with all the conditions and circumstances under which the supplies required under the contract will have to be made or furnished and with all the terms, clauses, conditions, specifications and other details of the contract, and the contractor shall not plead ignorance of any of those as excuse in case of complaint against or on rejection of supplies tendered by him or with a view either to asking for enhancement of any rates agreed to in the contract or to evading any of his obligations under the contract.

15. No payment will be made in advance for any supplies under this contract.

16. (*i*) The contractor shall not—

(*a*) assign or sublet the contract without written approval of the officer sanctioning the contract;

(*ii*) In the event of the contractor failing duly and properly to fulfil or committing breach of any of the terms and conditions of this contract or repeatedly supplying goods liable to rejection hereunder or failing, declining, neglecting or delaying to comply with any demand or requisition or otherwise not executing the same in accordance with the terms of this contract, or if the contractor or his agents or servants being guilty of fraud in respect of the contract or any other contract entered into by the contractor or any of his partners or representatives thereof with Government directing, giving, promising or offering any bribes, gratuity, gift, loan, perquisite, reward or advantage pecuniary or otherwise to any person in the employment of Government in any way relating to such officers or persons, office or employment, or if the contractor or any of his partners become insolvent or apply for relief as an insolvent-debtor or commence any insolvency proceedings or make any composition with his creditors or attempts to do so, then without prejudice to Government's rights and remedies otherwise, Government shall be entitled to terminate this contract forthwith and to blacklist the contractor and/or purchase or procure or arrange from Government stocks or otherwise at the contractor's risk and at the absolute discretion of the Stores Purchase Officer, Punjab, as regards the manner, place or time of such purchases, such supplies as have not been supplied or have been rejected under this agreement or are required subsequently by Government thereunder and in cases where issues in replacement are made from Government stocks or supplies, the cost of value of such stocks or supplies together with all incidental charges or expenses, shall be recoverable from the contractor on demand. And the contractor shall not be entitled to benefit from any profit which may thus accrue to Government.

The termination of this contract in whole or part under these conditions shall not be affected by the acceptance, meanwhile or subsequently, of supplies accepted or made at any station whether in ignorance of the termination or otherwise.

17. If any question, difference or objection whatsoever shall arise in any way connected with or arising out of this instrument or the meaning or operation of any part thereof of the rights, duties, or liabilities of either party, then save in so far as the decision of any such matter is hereinbefore provided for and has been so decided, every such matter including whether its decision has been otherwise provided for and/or whether it has been finally decided accordingly or whether the contract should be terminated or has been rightly terminated in whole or part and as regards the rights and obligations of the parties as the result of such termination shall be referred for arbitration to the Deputy Director of Industrial Research, Punjab, and his decision shall be final and binding and where the matter involves a claim the amount if any awarded in such arbitration shall be recoverable in respect of the matter so referred.

PUNJAB KHARIF CROP SUMMARY FOR 1949

1. *Season*—The rainfall during January 1949 was light to moderate, except in Shahpur, Jhang, Multan, Muzaffargarh and Dera Ghazi Khan districts which received no rain. During February and March it was generally above normal. Except for light rain in parts of some districts, the weather during April and May remained practically dry. Light to moderate rain fell in June. During July and August the monsoon was fairly active and gave sufficient rainfall especially in Sialkot, Gujranwala, Gujrat, Rawalpindi and Attock where the fall was heavy. Supplies of canal water was good and satisfactory on all canals except the Sutlej Valley Canals, viz., Dipalpur, Pakpattan (non-perennial) and Mailsi where the supply was fair. Climatic conditions were, therefore, generally favourable for sowings. During September the rainfall was above normal in Central and Western districts of the province but light elsewhere. The weather during October and November remained dry. Canal supplies were stisfactory for the maturing of the kharif crops. Light attack of Jassid and white-fly to the cotton crop was reported from parts of few districts.

2. *Yield*—The yield of cotton was normal to above normal in Multan Division and below normal to normal elsewhere. The yield of rice was average to good on irrigated and generally below normal to normal on unirrigated areas and that of sugarcane was fairly good. The outturn of jowar and maize was generally normal on irrigated areas and below normal on unirrigated areas but that of bajra was generally below normal to normal due to lack of adequate rains during the growing period.

3. *Areas*—The total sown area is 6·9 million acres against 6·4 million acres in the year 1948. The variations under principal crops are shown below:—

4. *Prices*—The prices were lower than those in the previous year except bajra. The prices of cotton American were, however, the same as those of the year 1948. Details for the last 10 years are given in the statement below:—

Four western disturbances affected N.-W. F. P. and the West Punjab, including the three which were associated each with a secondary Western disturbance.

A Western disturbance moving through the north N.-W. F. P. together with a secondary Western disturbance moving away through East Punjab hills caused fairly widespread rain in N.-W. F. P. on the 3rd and local rain and thundershowers in the north-west Punjab.

The second Western disturbance moving through N.-W. F. P. together with its secondary moving through north Baluchistan, both in a north-easterly direction, caused local thundershowers in north N.-W. F. P. and the north-west Punjab on the 4th and scattered thundershowers in N.-W. F. P. on the 5th and 6th.

Associated with another Western disturbance moving north-eastwards through north-east Baluchistan and the adjoining part of N.-W. F. P. and a secondary further south through upper Sind and the adjoining part of the south-west Punjab, local rain and thundershowers occurred in north N.-W. F. P. on the 9th and in the West Punjab on the 10th. Also fairly widespread rain and thundershowers occurred in N.-W. F. 14. The contractor acknowledges that he has made himself fully acquainted with all the conditions and circumstances under which the supplies required under the contract will have to be made or furnished and with all the terms, clauses, conditions, specifications and other details of the contract, and the contractor shall not plead ignorance of any of those as excuse in case of complaint against or on rejection of supplies tendered by him or with a view either to asking for enhancement of any rates agreed to in the contract or to evading any of his obligations under the contract.

THIS contract is to last from the 5th September 1950 to the 5th March 1951, but in the event of any breach of the agreement at any time on the part of the contractor the contract may be terminated summarily by the Stores Purchase Officer, Punjab, without compensation to the contractor.

Any change in the constitution of the firm shall be notified forthwith by the contractor in writing to the authority sanctioning the contract and such change shall not relieve any former member of the firm from any liability under the contract.

No new partner/partners shall be accepted into the firm by the contractor in respect of this contract unless he/they agree to abide by all its terms and conditions and deposit with the officer sanctioning the contract a written agreement to this effect. The contractor's receipt or acknowledgement or that of any partner subsequently accepted as above shall bind all of them and will be a sufficient discharge for any of the purposes of the contract.

2. The contractors will supply nothing but genuine padlocks in column 2 of Schedule A, from time to time in such quantities as may be entered in the indents sent at the rates setforth in column 3 of Schedule 'A' for use in Offices/Institutions/Departments under the administrative control of the Government of the Punjab, as may be required by the Indenting Officers, mentioned in Schedule C hereto annexed, on behalf of the Government. Requisitions from officers not mentioned in Schedule C hereto annexed should before compliance be sent in original to the Stores Purchase Officer, Punjab, for instructions and the officer concerned advised accordingly. No guarantee can be given as to the quantity which will be ordered during this period. But the purchaser undertakes to order from the contractors all stores as detailed in Schedule A which he requires to purchase, except that he reserves to himself the right of placing the contract with one or more contractors as he may think fit and in consideration of this undertaking by Government, the contractor binds himself not to revoke this contract during the said period.

Failing these facilities at his own premises for making the tests the contractor shall bear the cost of carrying out tests elsewhere. The contractor shall also provide and deliver free of charge at such place as the aforesaid officer may direct such materials as he may require for tests by chemical analysis or independent testing machine. If for the purpose of determining the quality of stores the aforesaid officer finds it necessary to have the stores tested at the test-house or laboratory, all expenses incidental to the test shall be borne by the contractor. 14. The contractor acknowledges that he has made himself fully acquainted with all the conditions and circumstances under which the supplies required under the contract will have to be made or furnished and with all the terms, clauses, conditions, specifications and other details of the contract, and the contractor shall not plead ignorance of any of those as excuse in case of complaint against or on rejection of supplies tendered by him or with a view either to asking for enhancement of any rates agreed to in the contract or to evading any of his obligations under the contract.

(*ii*) In the event of the contractor failing duly and properly to fulfil or committing breach of any of the terms and conditions of this contract or repeatedly supplying goods liable to rejection hereunder or failing, declining, neglecting or delaying to comply with any demand or requisition or otherwise not executing the same in accordance with the terms of this contract, or if the contractor or his agents or servants being guilty of fraud in respect of the contract or any other contract entered into by the contractor or any of his partners or representatives thereof with Government directing, giving, promising or offering any bribes, gratuity, gift, loan, perquisite, reward or advantage pecuniary or otherwise to any person in the employment of Government in any way relating to such officers or persons, office or employment, or if the contractor or any of his partners become insolvent or apply for relief as an insolvent-debtor or commence any insolvency proceedings or make any composition with his creditors or attempts to do so, then without prejudice to Government's rights and remedies otherwise, Government shall be entitled to terminate this

contract forthwith and to blacklist the contractor and/or purchase or procure or arrange from Government stocks or otherwise at the contractor's risk and at the absolute discretion of the Stores Purchase Officer, Punjab, as regards the manner, place or time of such purchases, such supplies as have not been supplied or have been rejected under this agreement or are required subsequently by Government thereunder and in cases where issues in replacement are made from Government stocks or supplies, the cost of value of such stocks or supplies together with all incidental charges or expenses, shall be recoverable from the contractor on demand. And the contractor shall not be entitled to benefit from any profit which may thus accrue to Government.

The termination of this contract in whole or part under these conditions shall not be affected by the acceptance, meanwhile or subsequently, of supplies accepted or made at any station whether in ignorance of the termination or otherwise.

17. If any question, difference or objection whatsoever shall arise in any way connected with or arising out of this instrument or the meaning or operation of any part thereof of the rights, duties, or liabilities of either party, then save in so far as the decision of any such matter is hereinbefore provided for and has been so decided, every such matter, including whether its decision has been otherwise provided for and/or whether it has been finally decided accordingly or whether the contract should be terminated or has been rightly terminated in whole or part and as regards the rights and obligations of the parties as the result of such termination shall be referred for arbitration to the Deputy Director of Industries, Industrial Research, Punjab, and his decision shall be final and binding and where the matter involves a claim the amount if any awarded in such arbitration shall be recoverable in respect of the matter so referred.

14. The contractor acknowledges that he has made himself fully acquainted with all the conditions and circumstances under which the supplies required under the contract will have to be made or furnished and with all the terms, clauses, conditions, specifications and other details of the contract, and the contractor shall not plead ignorance of any of those as excuse in case of complaint against or on rejection of supplies tendered by him or with a view either to asking for enhancement of any rates agreed to in the contract or to evading any of his obligations under the contract.

office or employment, or if the contractor or any of his partners become insolvent or apply for relief as an insolvent-debtor or commence any insolvency proceedings or make any composition with his creditors or attempts to do so, then without prejudice to Government's rights and remedies otherwise, Government shall be entitled to terminate this contract forthwith and to black-list the contractor and/or purchase or procure or arrange from Government stocks or otherwise at the contractor's risk and at the absolute discretion of the Stores Purchase Officer, Punjab, as regards the manner, place or time of such purchases, such supplies as have not been supplied or have been rejected under this agreement or are required subsequently by Government thereunder and in cases where issues in replacement are made from Government stocks or supplies, the cost of value of such stocks or supplies together with all incidental charges or expenses, shall be recoverable from the contractor on demand. WEATHER SUMMARY FOR THE PUNJAB AND THE N.-W. F. P. FOR JULY 1949

Four western disturbances and two lows moving from the south-east affected the region during the month and caused incursion of monsoon into the region which remained active practically for the last three weeks of the month.

The first western disturbance moving through the extreme north of the region accentuated the seasonal low which caused on the 8th and 9th fairly widespread moderate to heavy thunderstorms over and near the North Punjab hills and scattered light showers elsewhere in the plains of the North Punjab and the Upper N.-W. F. P. and Kashmir.

The passage of this western disturbance induced a strong monsoon current into the East Punjab (India) which gradually extended into the Punjab and the N.-W. F. P. and caused fairly widespread rain showers in the Punjab and scattered in the N.-W. F. P. on the 10th and local thundershowers in the North Punjab and Upper N.-W. F. P. in the 11th, 12th and 13th.

There was a temporary weakening of the monsoon on the 14th, but it strengthened again on the 15th with the appearance of a secondary western disturbance as a low over the N. W. Punjab and caused local thunder showers in the North Punjab and scattered in the Upper N.-W F. P. from 15th to 18th.

On 18th the third western disturbance appearad as a secondary low over N.-W. F. P. and on 19th moved into the S. W. Punjab, got accentuated and was responsible for fairly widespread rain and thunderstorms in the North Punjab and scattered in the North N.-W. F. P. on 19th, 20th and 21st.

The fourth western disturbance moved as a low pressure wave through the extreme north and caused fresh incursion of monsoon air into the Punjab which caused widespread rain and thunderstorms in the North Punjab and local in the Upper N.-W.F. P. on the 22nd and local thundershowers in the North Punjab on the 23rd.

The second low moving from the S. E. caused fresh advance of monsoon on 24th which caused scattered thundershowers in the North Punjab and local in the North N.-W. F. P. Fairly widespread rain showers occurred in the North Punjab and local in the N.-W. F. P. on 25th and fairly widespread rain in the North Punjab on 26th and local on 27th.

By 28th the low had moved into Rajputana and the monsoon had established itself fully in the region causing fairly widespread thundershowers on the 28th, on 29th the low moved to the S. W. Punjab and caused local thundershowers in the region on 29th and scattered on 30th and local rain showers on the Punjab on the 31st.

The mean maximum temperature was mostly in defect and was normal at Rawalpindi, Bahawalpur, Khanpur, Miran Shah, Parachinar, Cherat and Drosh. Whereas the mean minimum temperature was mostly normal, was in defect at Khushab, Montgomery and was in excess only at Murree.

The relative humidity was mostly in excess and was normal at Sialkot, Muree, Montgomery, Khanpur, D. I. Khan, Cherat and Drsh.

The total cloud amount was in defect at Bahawalpur and Khanpur ; was normal at Khushab, Lyallpur, Murree, Bannu, D. I. Khan, Miran Shah and Cherat, otherwise was in excess.

The total rainfall of the month was in large defect at Bahawalpur, Khanpur, D. I. Khan, Peshawar and Drosh, slight defect at Parachinar only, was normal at Lahore, Khushab, Miran Shah and Cherat, slight excess only at Murree was in moderate excess at Sialkot, Lyallpur and Montgomery, was in excess only at Rawalpindi, and was conspicuously in large excess only at Bannu.

P. and a few thunderstorms *with light* showers elsewhere *in the* plains of the Punjab on 17th.

18th.—With slight weakening of the North Punjab low a few thunderstorms occurred over the North Punjab and a few light thundershowers over the N.-W. F. P.

19th.—The low over the North Punjab accentuated due to movement of a Western disturbance at higher latitudes and resulted in the occurrence of local thunderstorms with shower over the North N.-W. F. P. and a few thunderstorms with light showers in the North Punjab.

20th.—The North Punjab low weakened and local thunderstorms with light showers occurred over the Murree hills and scattered in the North N.-W. F. P. and elsewhere in the Punjab.

21st.—A western disturbance passing through Kashmir and the North Punjab low caused local dust thunderstorms with light showers in the N.-W. F. P. local rain and thunderstorms over and near the Murree hills and scattered thunderstorm with light showers elsewhere in the North Punjab and adjoining South Punjab.

23rd and 24th.—The low over the North Punjab became shallow and a few light showers occurred in the upper N.-W. F. P. on 23rd and scattered thunderstorms with light showers over and near the Murree hills and a few thunderstorms elsewhere in the hills and a few thunderstorms el sewhere in the plains of the Punjab on 24th.

25th and 26th.—Under the influence of a western disturbance passing at higher latitudes the low over Sind and Baluchistan accentuated and caused fairly wide spread rain and thundershowers in the Punjab and local in the N.-W.F.P. on 25th and scattered thundershowers over the Murree hills and a few light thunderstorms in the Punjab on 26th.

28th.—A western disturbance affecting the Punjab caused scattered ligth thundershowers over the South Punjab.

30th.—A low appeared over the South Punjab and adjoining region of lower N.-W.F.P. and was responsible for scattered thundershowers in the N.-W.F.P.

The mean maximum temperature was normal mostly and was in defect at Khushab, Khasnpur, Bannu and D. I. Khan. The mean minimum temperature was also normal mostly, except was in defect at Lahore, Khushab and Miranshah.

The relative humidity was mostly normal, was in excess at Khushab and Parachinar and was in defect at Sialkot, Murree, Montgomery, Peshawar and Cherat.

WEATHER SUMMARY FOR THE WEST PUNJAB AND THE N.-W. F. P. FOR THE MONTH OF SEPTEMBER 1949

Nine Low pressure waves from the west and 2 lows from the Bay of Bengal affected the weather in the region during the month.

The First Low pressure wave (L. P. W.) caused local thundershowers in the north N.-W. F. P. and scattered thundershowers over the Murree Hills on the 1st.

The second L. P. W. closely followed the first and accentuated the seasonal trough of low pressure over the Punjab local and caused local moderate thundershowers in the N.-W. Punjab and scattered thundershowers in the north N.-W. F. P. on the 2nd and scattered thundershowers in the N.-W. Punjab on the 3rd.

The third L. P. W. in conjunction with the movement of a Low from the Bay of Bengal into the United Provinces, caused isolated thundershowers in the N.-W. Punjab and the north N.-W. F. P. on the 4th and 5th and scattered thundershowers in both these areas on the 6th.

The fourth and the fifth L. P. Ws. caused isolated thundershowers in the north N.-W. F. P. on the 12th and 13th respectively.

The sixth L. P. W. caused isolated thundershowers in the N.-W. Punjab and the north N.-W. F. P. on the 15th.

The second low from the Bay of Bengal moved into the S.-W. Punjab and caused isolatad light showers in the N.-W. Punjab on the 18th and scattered rain in the east Punjab on the 19th. At this stage the seventh L. P. W. moved across the N.-W. F P. Due to the combined effect of these local thundershowers occured in the N.-W. Punjab and scattered thundershowers in the N.-W. Punjab and the north N. W. F. P. on the 20th.

The eighth L. P. W. caused isolated thundershowers in the extreme north N.-W. F. P. on the 25th and 26th.

The ninth L. P. W. accentuated the seasonal low over the Punjab. Due to their combined effect scattered thundershowers occurred in the north N.-W. F. P. and over and near the Murree hills on the 27th and 28th and fairly widespread light to moderate thundershowers in the N.-W. Punjab and local thundershowers in the north N.-W. F. P. on the 29th.

The mean maximum temp. was mostly in excess and was normal at Murree, Bahawalpur, Khanpur and Drosh where as the mean minimum temperature was also mostly in excess being normal at Khushab and Khanpur.

The relative humidity was mostly normal, was in excess only at Rawalpindi, otherwise was in defect at Sialkot, Montgomery and Khanpur.

The total colud amount was normal at Lahore, Sialkot, Lyallpur, Rawalpindi, Murree and Peshawar; was in excess at Montgomery, Bahawalpur, Khanpur, and Drosh, but was in defect at Khushab, Bannu, D. I. Khan, Miran Shah, Parachinar and Cherat.

The total rainfall of the month was exceptionally in large excess at Bahawalpur, Khanpur and Drosh ; slight excess at Sialkot, normal at Rawalpindi, Murree and Lahore ; was in moderate defect at Lyallpur, Bannu and Parachinar and otherwise was in large defect at the remaining stations.

SUMMARY FOR THE WEST PUNJAB AND THE N.-W.F. P. FOR THE MONTH OF OCTOBER 1949

Six active western disturbances affected the West Punjab and the N.-W. F. P. during the month.

A low appeared over Sind and West Rajputana and caused fairly widespread thunderstorms with light rain and drizzle over the Murree hills and neighbouring plains and local thundershowers over North N.-W. F. P. on first.

The first western disturbance moving through north Kashmir caused a few light thundershowers in the extreme north N.-W. F. P. on 15th.

The second western disturbance approaching N.-W. F. P. with a secondary lying over the South Punjab and adjoining Sind caused a few light thundershowers over the North N.-W. F. P. and isolated light thundershowers over North Punjab on 16th. On 17th in moving away through north Kashmir it caused a few light thundershowers over north N.-W. F. P.

The third western disturbance moving away through Kashmir in association with a low over N. E. Baluchistan and adjoining south Punjab caused a few light thundershowers in the upper N.-W. F. P. on 18th and scattered thundershowers in North N.-W. F. P. and Murree hills on 19th.

The fourth western disturbance in association with an induced a low over the south Punjab caused light rain or drizzle at a few places in the north N.-W. F. P. on 21st and scattered thundershowers over and near the Murree hills on 22nd.

The 5th western disturbance affecting the north N.-W. F. P. on 23rd caused scattered light thundershowers there.

The last western disturbance lying over north Punjab became active under the influence of a Bay Depression and caused scattered thunderstorms with light showers in the north N.-W. F. P. and over and near the Murree hills and isolated light thundershowers elsewhere in the plains of the north Punjab on 28th local thundershowers over upper N.-W. F. P. and scattered over lower N.-W. F. P. and over and near the Murree hills on 29th and a few falls of rain or showers over the north N.-W. F. P. on 30th.

The mean maximum temperature was normal mostly and was in defect at Sialkot, Montgomery, Bahawalpur, Khanpur, D. I. Khan, Peshawar and Drosh whereas the mean minimum temperature was also mostly normal and was in excess only at Sialkot and in defect only at Khushab.

The relative humidity was in defect at Sialkot, Montgomery, Bannu, D. I. Khan, Miranshah, Peshawar and Cherat and was normal at the other stations except that it was in excess only at Khanpur.

The total cloud amount was mostly in defect was normal at Lahore, Khushab, Rawalpindi and Murree and was in excess at Sialkot and Drosh.

The contractor shall not charge or be paid for supplies rejected as above and such supplies shall be removed by the contractor at once and at his expense. 9. The contractor shall provide without any extra charge all materials, tools, labour and assistance of every kind which the aforesaid officer may consider necessary for any test or examination which he may require to be made on the contractor's premises and shall pay all costs attendant thereon. In the case of stores inspected at maker's premises the maker shall provide all facilities including testing appliances, for making necessary tests other than special tests or independent tests. Failing these facilities at his own premises for making the tests the contractor shall bear the cost of carrying out test elsewhere. The contractor shall also provide and deliver free of charge at such place as the aforesaid officer may direct such materials as he may require for tests by chemical analysis or independent testing machine. If for the purpose of determining the quality of stores the aforesaid officer finds it necessary to have the stores tested at the test-house or laboratory, all expenses incidental to the test shall be borne by the contractor. On the failure of the contractor to pay the expenses within ten days of the receipt of intimation in this behalf from the Inspecting Officer, the Stores Purchase Officer shall have the right to deduct the amount from the security deposited by the contractor and if the amount so deducted is not deposited within ten days, the Stores Purchase Officer may treat the default as a breach of the agreement and proceed under clause (1) of the agreement without further notice. (ii) Railway receipt will be forwarded to the consignee immediately after despatch of stores. Should any demurrage charges be incurred owing to delay on the part of the contractor in forwarding the railway receipt, the amount of such charges will be deducted from the bill.

(iii) The contractor shall despatch material " Freight paid " in all cases where their offer is f. o. r. destination. In the event of their failure to do so, a penalty of 5 per cent will be charged on the amount paid as freight by the indenting officer on their behalf.

(iv) The contractor will send to the Stores Purchase Officer, Punjab, quarterly statement of goods supplied under this arrangement in the following form :—

(v) All despatches by rail will be made at Railway Risk at the expense of the Indentor (except by firms who have quoted rates f. o. r. any place in the Punjab) unless the indentor gives instructions to despatch at owner's risk in which case all responsibility for loss in transit will be with the indentor.

This is subject to the condition that the materials are securely packed by the suppliers in sound containers and the consignment is accepted by the carriers without any adverse remarks as to the packing or the condition of the containers. In case of any adverse remarks, the responsibility for the losses in transit will rest with the suppliers.

Subject to these conditions the contractor will not be entitled to charge or be paid for supplies broken, lost or damaged in transit. The Stores Purchase Officer, Punjab, will be the authority to determine whether or not the breakage, loss or damage was caused through the contractor's negligence and the decision of the Stores Purchase Officer, Punjab, or some other officer acting in his behalf shall be final and conclusive against the contract. Such rejected supplies shall be removed by the contractor at his own expense.

(vi) If, during the currency of the contract the specification of any article or articles to be supplied thereunder be changed, the contractor shall continue to comply with demands for the supply of the said article or articles in accordance with the new specifications at a rate to be mutually agreed to in writing at the time of such change, and in default of such agreement, the contract in so far as it relates to the said article or articles in respect of which no agreement has been arrived at, shall terminate but no such change shall affect the supply of any other articles under the contract or entitle the contractor to any compensation.

13. In the event of withdrawal or discontinuance of any article or articles and consequent ceasing of or reduction in demand, the contractor shall not be entitled to any compensation. Government will, however, make all reasonable endeavours to give warning of any impending complete withdrawal or of any reduction seriously affecting quantities likely to be required under the contract.

14. The time for and date of delivery or despatch stipulated in the said schedule shall be deemed to be the essence of the contract and should the contractor fail to deliver or despatch any consignment within the period prescribed for such delivery or despatch in the said schedule, then without prejudice to his rights otherwise the purchaser shall be entitled to recover from the contractor a sum of 2 per cent of the contract price of such consignment for each and every month or a part of a month during which the supply or despatch of such consignment may be in arrears, or alternatively at the option of the purchaser, the purchaser shall be entitled to purchase such consignment (or if not

available, the best and the nearest available substitute therefor) elsewhere on the account and at the risk of the contractor or to cancel the contract, and the contractor shall be liable for any loss or damage which the purchaser sustains by reason of such failure on the part of the contractor.

15. The contractor acknowledges that he has made himself fully acquainted with all the conditions and circumstances under which the supplies required under the contract will have to be made or furnished and with all the terms, clauses, conditions, specifications and other details of the contract and the contractor shall not plead ignorance of any of those as excuse in case of complaint against or on rejection of supplies tendered by him or with a view either to asking for enhancement of any rates agreed to in the contract or to evading any of his obligations under the contract.

(*ii*) In the event of the contractor failing duly and properly to fulfil or committing breach of any of the terms and conditions of this contract or repeatedly supplying goods liable to rejection hereunder or failing, declining, neglecting or delaying to comply with any demand or requisition or otherwise not executing the same in accordance with the terms of this contract, or if the contractor or his agents or servants being guilty of fraud in respect of the contract or any other contract entered into by the contractor or any of his partners or representatives thereof with Government directing, giving, promising or offering any bribes, gratuity, gift, loan, perquisite, reward or advantage pecuniary or otherwise to any person in the employment of Government in any way relating to such officers or persons, office or employment, or if the contractor or any of his partners become insolvent or apply for relief as an insolvent-debtor or commence any insolvency proceedings or make any composition with his creditors or attempts to do so, then without prejudice to Government's rights and remedies otherwise, Government shall be entitled to terminate this contract forthwith and to black-list the contractor and/or purchase or procure or arrange from Government stocks or otherwise at the contractor's risk and at the absolute discretion of the Stores Purchase Officer, Punjab, as regards the manner, place or time of such purchases, such supplies as have not been supplied or have been rejected under this agreement or are required subsequently by Government thereunder and in cases where issues in replacement are made from Government stocks or supplies, the cost of value of such stocks or supplies together with all incidental charges or expenses, shall be recoverable from the contractor on demand. And the contractor shall not be entitled to benefit from any profit which may thus accrue to Government.

The termination of this contract in whole or part under these conditions shall not be affected by the acceptance, meanwhile or subsequently, of supplies accepted or made at any station whether in ignorance of the termination or otherwise.

18. If any question, difference or objection whatsoever shall arise in any way connected with or arising out of this instrument or the meaning or operation of any part thereof of the rights, duties, or liabilities of either party, then save in so far as the decision of any such matter as hereinbefore provided for and has been so decided, every such matter including whether its decision has been otherwise provided for and/or whether it has been finally decided accordingly or whether the contract should be terminated or has been rightly terminated in whole or part and as regards the rights and obligations of the parties as the result of such termination shall be referred for arbitration to the Deputy Director of Industries, Industrial Research, Punjab, and his decision shall be final and binding and where the matter involves a claim the amount if any awarded in such arbitration shall be recoverable in respect of the matter so referred.

PUBLISHED BY AUTHORITY

LAHORE, FRIDAY, APRIL 28, 1950

GENERAL
DEVELOPMENT DEPARMENT
(AGRICULTURE)

Review of the Annual Report of the Agriculture Department, Punjab, for the year 1948-49.

The 18th April, 1950.

No. 1227-D (A)-1—(*i*) The report dealing with the activities on the working of the Agriculture Department is for the year ended the 30th June, 1949 and is the second report prepared by the department after the partition of the Punjab. It may be taken to be the first report in a new era of peace for the people of this province. Being only the first year of peace, much improvement and development in the Agricultural life cannot be expected. This report, therefore, shows that good foundations have been laid for progress in future years.

(*ii*) The position of the provincial exchequer still demands the observance of economy on all expenditure. It has, accordingly been decided again this year to print only a brief review of the activities of the department and not the actual report.

2. During the year under report the Agriculture Department consisted of 67 Gazetted Officers as against 70 of the previous year and 114 of the year before partition; 189 Agricultural Assistants as against 211 of the previous year and 508 of the year before partition; 10 Demonstrators as against 13 of the last year and 377 Mukaddams as in the previous year. There has, therefore, been no increase in the number of various types of officials in the department except that there was a small increase in the number of Beldars, Fieldmen, Laboratory Assistants, etc. The total expenditure on the department during the year under report was Rs. 97,05,196 against an income of Rs. 72,04,779 showing a net expenditure of Rs. 25,00 417.

3. *Punjab Agriculture College, Lyallpur*—(*i*) The Lyallpur Agriculture College completed its 41st year of existence. During the year under report the college has shown sufficient improvement in all directions though the number of Assistant Professors was still less by three than required. The college continued as a combined Institution for Agricultural education and Agricultural research. The matter of dividing it into two separate teaching and research institutions has been postponed for the present on account of financial considerations.

(*ii*) Admissions were made as in normal years to the 1st year class only in June, 1949. 93 students were admitted of whom 83 joined the college. After this year's admissions, total number of students on the college roll became 523 in different classes as shown below :—

B.Sc. (Agr.)	257
M.Sc. (Agr.)	22
13 Other Classes	244
Total	523

University results of the supplementary examinations held in October, 1948 and the annual examinations held in May, 1949 showed very good pass percentages.

(*iii*) There was marked improvement in the maintenance of the College Dairy. The total income of Rs. 34,095-13-0 against an expenditure of Rs. 36,354-8-9 shows a deficit of Rs. 2,258-11-9 as against a deficit of Rs. 12,852 of the previous year. Government hope that with a little more attention this dairy can run at a reasonable profit and that the department will pay the required attention to this matter. The College Dispensary, Co-operative Society, Red Cross Society, Students' Farm and Hostels continued to function properly. The U. O. T. C., Militia, Rifle Club, Sports Club, Tennis Club and Dramatic Club continued their activities zealously.

4. *Crop Research Work*—The department have been paying due attention to the work of crop research during the year under report. In a short review like the present it is not possible to mention all the work that is being undertaken. A few items of research work done on the improvement of some of the major crops, are, however, given in brief.

Cotton—Research work on the evolution of new varieties has continued during the year both on American and Desi Cotton at the main cotton research station at Lyallpur and the three sub-stations at Jhang, Multan, and Montgomery. Research work for the improvement of cotton is directed by re-selection, hybridization, acclimatization of the long-linted types and by crosses between the American and Egyptian cottons. These researches have been carried out for the improvement of the known varieties of LSS, 4F, 289F/43 and the Lassani Cotton. Punjab Cotton Control Act, 1949 was promulgated during the year under report by which main ecological zones have been demarcated and the best suited varieties for each zone have been prescribed. Restrictions imposed on mixed ginning of several varieties and mixed sowing will help to keep the strains of higher yield pure throughout. This step taken by Government will go a long way in making the research work practically effective. Improvement of cotton by the import of new varieties from different parts of the world is in hand. New Crosses from America, Egypt, Sudan, South Africa and East Africa are also in hand. The restriction imposed by the Cotton Control Act on the growing of Desi cotton in the major portion of the cotton growing areas of the province will reduce the importance and the production of the Desi Cotton.

Wheat—The main wheat research station at Lyallpur, the sub-station for the production of rain-fed varieties at Rawalpindi and the small sub-station for rapid production of seed in the hills at Murree continued the research work on wheat. The standard varieties so far known are (a) Irrigated C591 and C518, (b) Barani C217, (c) for the sub-mountain area C250, and (d) for late sowing in the irrigated areas C228. The selection and hybrids already being experimented upon have been extensively tested against standard varieties and some of them have given higher yield than the standard varieties. For the production of pure, graded, disease free foundation seed of improved varieties of wheat a separate foundation seed production Farm exists near Montgomery. 3,000 maunds of such seed were produced during the year to spread on Government Farms and other Farms of selected landlords. This seed will then be spread on a large scale among the cultivators.

Gram—The research work in progress at Lyallpur, Campbellpur and Murree has been directed during the year to evolve a variety which may be immune from the two important fungus diseases, viz., Gram-blight and Gram-wilt. Many reciprocal fresh crosses have been made between the white seeded and brown seeded types and hybrids. Type Punjab-7 a recent evolu-

tion is resistant to some extent to Gram-wilt, but is susceptible to Gram-blight, but is the best at hand at present. F 8 which is resistant to Gram-blight is susceptible to gram-wilt. The latest type is C1234 which is resistant to Blight and to some extent to Wilt. A third disease, viz., "Smalling of leaves" has recently come to notice and evolution of a variety immune from this disease is also in hand.

Rice—The experimental work of evolution of new varieties by selection and by breeding and rice technology connected with milling and cooking tests and grade standards was carried on at the Government Rice Farm, Kala Shah Kaku during the year under report. Researches were made to find the effect of different sowing times on flowering, life of the crop and yield of grain, agronemic and cultural experiments and multiplication of seeds of improved varieties. 113 well known rice varieties imported from India and other foreign countries were raised as pure lines in small plots for further study. Yield trials of 63 improved selected varieties were made. The Jhona group has become very popular with the growers on account of their heavy yield and comparative freedom from Rice Borer attacks. 349 Jhona is the standard variety and Jhona-160, S-3 and 314-P are other promising varieties. Jhona Kasarwala, Begum Narrot, Palman, Son, Ziris, Bara, Ratua, Ratta Dhanj and Mushkan varieties are under trial at the Farm. Manurial experiments on rice are also in hand and the results of various kinds of manures are being recorded. Kala Shah Kaku Rice Farm produced 3,100 maunds of pure nucleus seed of selected varieties of rice. Jhona and Basmati varieties are in greatest demand.

Sugarcane—(*i*) The main research work started last year and carried on during the year under report was to find out a place in West Pakistan where seed and seedlings considered suitable for our climate could be produced, as the previous source was Coimbatore which is now lost to Pakistan. The result of these investigations is that a suitable place in the lower Sind area will be selected where cane produces fertile flowers and viable seed. The establishment of a sugarcane breeding station in that area will solve the present difficulties in this connection. Arrangements have for the present been made with other countries especially Barbados to breed varieties for our requirements.

(*ii*) In the absence of breeding facilities the work carried on at the Lyallpur Sugarcane Research Farm on sugarcane improvement has been varietal studies and agronomic studies. The results achieved by varietal studies are that two varieties, viz. Co. L29 and Co. K30 have been selected. Co. L29 is a rich early cane, grows erect and vigorously. Co. K30 shows tolerance to some unfavourable conditions of growth. Agronomic studies consisted of manurial, irrigational and cultural experiments.

5. Only a passing reference can be made to other crops on many of which very important work is being done. Research in Oil Seeds, Tobacco and Fodder crops has produced good results. Fruit Growing, preservation, cold storage of fresh fruit and vegetable growing are receiving due attention.

6. *Seed Distribution*—The department maintained five Experimental Farms, five District and Demonstration Farms and ten Seed Farms. In addition to these there are four Seed Grants for the production of pure and improved seed for the requirements of the Agriculture Department. The department has been carrying on the distribution and sale of seed of improved varieties

Total seed distributed during the year was 3,83,937 maunds as detailed below—

Wheat	..	2,31,693	maunds
Cotton	..	98,871	,,
Gram	..	15,127	,,
Sugarcane (Setts)	...	10,467	,,
Rice	..	1,386	,,
Barseem	..	213	,,
Maize	..	18,146	,,
Other seeds	..	8,034	,,
Total	...	3,83,937	,,

Out of this quantity 54,110 maunds of pure improved seeds were produced in the departmental Farms.

7. *Fisheries and Games*—(*i*) The number of Fry Farms maintained last year was 18 only which was increased to 500 during the year under report. The number of Fish Farms last year was 14, which was increased to 30 during this year. Some more Fish Farms have been opened to anglers. The total quantity of fish marketed during the year was 21,000 maunds. The Fisheries Section inaugurated and ran its own markets.

(*ii*) The total income of the Fisheries Section during the year was Rs. 2,32,400 against a total expenditure of Rs. 1,17,200. Thus there was a saving of Rs. 1,15,200. Total income from the Game Section during the year was Rs. 2,50,943-1-0 and the expenditure Rs. 92,080-12-0 showing a net income of Rs. 1,58,863-5-0. Arms licence fees were the main source of income.

8. On the whole the annual report of the Department of Agriculture shows a good year's work done by the Department. Government, however, hope that still better results will be achieved in the coming years.
